and discover the future of stone processing

## HALL 7

### Stand C3

#### Tools & Machines

#### DIAMOND TOOLS

Our high-quality diamond CNC Profile Wheels and Polishing Tools are ideal for shaping, finishing, and polishing marble, granite, quartz, and other natural stones.

#### MARMO PRESETTER

This fully automated device scans CNC tools with high precision, ensuring accurate setup, optimizing preparation time, improving work quality, and extending tool life.

#### MARMO SHARPENER

This machine is designed to precisely and easily restore diamond tools, making it ideal for professional workshops. It extends tool life and reduces long-term operating costs.

#### MASTER5000

A versatile manual machine for profiling and polishing stones and composite materials. With a powerful, adjustable motor and smart features, it delivers excellent results from roughing to finishing.

#### MASTER4000

This machine revolutionized stone processing with its exceptional versatility and durability, providing professionals with precise and reliable profiling and polishing options. It set a new industry standard.

#### MARMO SMART STATION

An innovative device offering precise control over stone processing, combining traditional methods with advanced technology for exceptional performance on marble, granite, and other stones.

## HALL 4

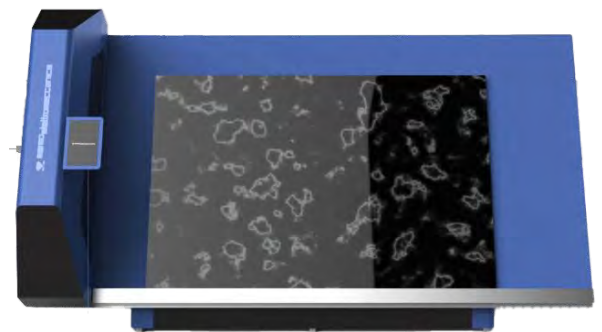

### Stand B4

#### Machines

#### MARMO TRONIC HYBRID LINE<sup>8+8</sup>

A hybrid CNC machine designed to combine edge profiling and edge polishing functions. It offers feed speeds up to 5000/mm and is fully automated, ensuring perfect polishing for any profile and material.

#### MARMO VIEWER 3D<sup>ML</sup>

This advanced natural stone slab scanner offers 12000k resolution, scans up to 4000×2200 mm with automatic size detection, and exports files in JPG and DWG formats. It also has an optional warehouse management feature for added versatility.
